Adaptable
Training peers
Data management
Establishing priorities
Setting standards
Planning and Development
Inventory Control
Troubleshooting
Repair
Dependable

PROFESSIONAL EXPERIENCE

2008 - Current

CH2MHILL/Operations Management Inc. - Denver, Colorado

CH2M HILL has been a global leader in full-service engineering, procurement, construction, management, and operations, and our staff works on some of the most challenging and inspiring projects — all across the globe.

Enviornmental Management

Oversee activities at Construction Sites, Chemical Sites, Landfills, and WasteWater Treatment locations in various locations throughout the Southeastern United States.

Supervised many Sites contributing to Enviornmental Cleanup of Streams, Land, and Air.

Dow Reichhold – Chickamauga, GA

1991 – 2008

A global, industry leader in the manufacture of specialty latex. A joint venture of the Dow Chemical Company and Reichhold, Inc. with headquarters in Triangle Park, N.C.

Chemical Waste Water Treatment Operator

2006 – 2008

Control Waste Treatment process and oversee activities of the area to efficiently achieve goals and meet required State regulations. Pull necessary samples and analyze for state reporting requirements. Responsible for interpreting charts, graphs, and process needs.

- Resolved issues at our Wastewater Facility eliminating the need of hauling water offsite for treatment. This saved our company thousands of dollars.
- Established schedule to maintain proper equipment function
- Recorded accurate documentation manually and by computer to report water discharged to creek and to measure the progress of the facility.
- Controlled Waste Treatment process and directed routine activities and schedules of cleaning equipment as necessary.
- Performed jar tests to determine waste water needs to effectively run the operation and limit bottle-necks.
- Accurately measured chemicals to save the company money and loss of product.
- Conducted daily inventory, recorded correct raw material levels, and reported any problems.
- Worked independently and efficiently to streamline the process.

PROFESSIONAL EXPERIENCE continued

Dow Reichhold continued Chemical Operator

1993 – 1999 and 2003 – 2006

Monitored and operated all equipment and processes to produce variety of base latex's according to specifications

Facilitated charging process through reactors, including pre-weighing materials, monitoring reactors and ensuring charges are completed and accurate according to specifications; transferred batches among reactors to ensure seamless process.

Made solutions needed for all phases of production and stabilized reactors for optimal performance.

Assisted chemical stripper operator as needed to prevent process back up; maintained documentation of sample results.

Unloaded railcars and raw materials from tank trucks, accounting for and documenting shipment inventory, and collecting spot samples to send to lab.

Shift Maintenance Mechanic

1999-2003

Responded to calls from other co-workers about equipment failure and provided support in supplying necessary parts and supplies from the shop area in addition to equipment repair

Reset breakers as needed and made effort to resolve the problem.

Rebuilt air pumps and replaced hoses and fittings.

Scheduled with supervisor all down time associated with production.

Repaired items as fast as possible to reduce downtime and streamline production.

Shipping Compounding operator

1991-1993

Responsible for compounding in process material into finished product for shipment to customers and knowing the process of truck loading, filtering and inventory control

Made compounds following a recipe to correct specifications.

Weighed chemicals to assure accuracy.

Followed instructions carefully to make the customer happy.
Loaded Tanker Trucks with liquid emulsion.
Filtered final product and pumped to storage maintaining correct level in tanks.

PROFESSIONAL EXPERIENCE continued

Municipal Court Judge – Lafayette, GA

2006 – 2008

Sole Municipal Judge

Oversee court proceedings while directing staff to insure an orderly court.
Maintain the court docket verifying accuracy to eliminate mistakes.
Record accurate documentation manually and by computer to report to the state.
Direct routine activities and provide support for defendants and prosecutors.
Schedule out of town training courses and keep records of expenses.
Make important decisions that affect the lives of other people.
Communicate with the public extensively in person, on the phone, and in large groups.

Astro Mills – Lafayette, GA

1988 – 1991

Astro Mills specialized in heat set woven and spun yarn. The company was known for their ability to provide a quality product at an affordable price without sacrificing value.

Maintenance Mechanic / Security Guard

Responsible for maintaining and repairing equipment while making every effort to rebuild parts and service machinery creating a schedule to reduce malfunctions and breakdowns.

Established schedule for preventive maintenance.
Replaced parts on a time schedule to reduce unexpected failures.
Ordered parts, tools, and kept an accurate inventory.
Reset breakers and replaced blown fuses on non-working equipment.
Was available on call for fast response in case needed.
Also served as the Guard at this location.

Color Strand, Lafayette, GA

1987 – 1988

Color Strand manufactured died knitted yarn. Yarn was knitted, dyed, and then separated back onto spools for customers. This was all done by a process similar to an assembly line. The product started at one end and by the time it reached the other, it was time to wind onto cones. My work time there was minimal as I was in High School but the experience was unique.

Dryer Operator

Responsible for operating dryers that heat set yarn.
Performed quality control to make sure the product met specifications.
Delivered the final product to winding personnel keeping up with customer lot numbers.

Personal Protective Equipment Training
Radiofrequency Radiation Training
Safe Behavior Observation Training
Waste Management**

MISC

In addition to my career at Dow Reichhold Specialty Latex, the Chemical Plant announced its closure in June of 2008. This was due to business conditions associated with the 2008 Recession, as well as other issue's. At that time, Volunteers were sought to remain at the facility for demolition services. Several employees volunteered, but only a few stayed. I am one of the volunteers that remained and helped bring the business to an orderly close. In March of 2009, I was hired by CH2MHILL to liquidate the assets, and demolition the site I had worked at for 17 years. With the help of my good friend Leon Lewis, We managed to complete the demolition with no injuries, no fines, and a very satisfied client.
